PROFESSIONAL SUMMARY

Detail-oriented Computer Science undergraduate with hands-on experience in machine learning, computer vision, and software development through academic and team projects. Skilled at building and testing models with Python, TensorFlow, and OpenCV, creating web apps with Flask and REST APIs, and managing data with SQL and MongoDB. Comfortable working independently and in remote teams. Seeking an internship or entry-level role in AI/ML, software development, or data science.

CORE SKILLS

- **Programming:** Python, C, SQL
- **Machine Learning & Vision:** TensorFlow, PyTorch, OpenCV, CNN-based classification
- **Data & Databases:** MySQL, MongoDB, Data Cleaning, Data Analysis, Power BI, Tableau
- **Tools:** Flask, Docker, Git, VS Code, Microsoft Fabric
- **Soft Skills:** Problem Solving, Teamwork, Communication, Attention to Detail

PROJECTS

Deepfake Detection System | Machine Learning & Computer Vision | 2024
Tools: Python, TensorFlow, OpenCV, Flask, Docker

- Extracted video frames and prepared a labeled dataset for real vs. fake image classification.
- Trained and evaluated a CNN model, reviewing mislabeled samples to improve accuracy.
- Followed clear evaluation criteria to keep data quality consistent across thousands of frames.
- Containerized the pipeline using Docker so results can be reproduced easily.

AI-Based Adaptive Traffic Signal Control | Computer Vision & Data Modeling | 2025
Tools: Python, Flask, OpenCV

- Processed video footage of traffic intersections to measure vehicle density patterns for model training.
- Kept data consistent across different conditions (night, rain, high-density traffic).
- Worked remotely with team members to review data batches and improve the process.
- Helped achieve ~51% lower waiting time and 56% higher throughput compared to fixed-time systems.

GrayCON - Crypto Settlement Platform | Data Management & Backend | 2026
Tools: Python, MongoDB, REST APIs, HTML, CSS, Git | Live Site

- Designed and managed MongoDB databases for financial transaction records with strict data confidentiality.
- Reviewed platform-generated data to make sure it followed project rules and stayed accurate.
- Worked independently in a distributed remote team and adapted to changing project requirements.

CERTIFICATIONS

- Get Started with Real-Time Intelligence in Microsoft Fabric - Microsoft, Sep 2026
- Deloitte Australia - Data Analytics Job Simulation - Forage, Sep 2026
- Python Essentials 1 - Cisco, Sep 2026
- Get started with Copilot in Power BI - Microsoft, Jun 2026
- Introduction to End-to-End Analytics using Microsoft Fabric - Microsoft, Jun 2026
- Discover Data Analysis - Microsoft Learn, Jun 2026

EDUCATION

B.Tech in Computer Science and Engineering | IILM University, Greater Noida | 2023-2027
Class 12 | Noida Public Sr. Sec. School | 2022-2023
Class 10 | Noida Public Sr. Sec. School | 2020-2021

ACHIEVEMENTS & EXTRACURRICULAR

- Played in the college football team and inter-college tournaments; won multiple tournament trophies, showing teamwork, discipline, and adaptability.
- Attended volunteering events, workshops, and technical seminars, showing a steady drive to keep learning and improving.
